1 Introduction

This document contains information about SOW, the scope of the project and will describe some of the terminology used in this application.

1.1 Purpose

This document will provide a high-level basis for technical requirement, it will show the design constrains and will provide an overview of the system to be developed.

1.2 Scope

The scope of this project is to design a web application, which can match and find friends based on some criteria defined by user.

1.2.1 In Scope

Finding friends for children based oh parent's criteria.

Option for searching friend based on language.

Option for searching friend based on nationality.

Option for searching friend based on children's hobbies.

Option for searching friend based on personality.

Option for searching friend based on skills such as dance, sport, playing music, singing or any kind of skills for children.

Option for searching friend based on especial needs for CDWS.

Option for searching friend based on allergies.

Option for searching friend based on children's favorites game or activities.

1.2.2 Out of Scope

System will not match any friends for adults; neither provides extra features such as finding daycare, health care or schools.

The application will not provide the functionality of sharing media contents such as, picture, movies, audio or files.

1.3 Definitions, Acronyms, and Abbreviations

MBF: My Baby Friend

SOW: Scope of Work

CWDS: Children with Disabilities

Child: Referred to any kid who is under the parent's supervision under age of 13.

1.4 References

Reference File Name	Version	Description
Project Summary	1.0	Describes the project – problem/opportunity assessment
Business requirement and use cases	1.0	Describes the requirements of the business and possible use cases
System Overview and context	1.0	Describes the overview of the application and system context

2 Positioning

2.1 Business Opportunity

With this application, we will provide help to many family situations, such as new comers, those who have recently moved to a new town or city, families with children with special needs, and many more to find friends for their children. The friend matching process is based on the criteria defined by parents. This can benefit the parents too as they can meet and share experiences.

2.2 Problem Statement

The Problem of	Children getting used to new environments and adopting themselves
affects	Children and Parents
the impact of which is	Children are feeling lonely and have difficulty finding friends once they move to a new city, country or new location
a successful solution would be	Parents would be able to find better match friends for their kids based on so many criteria's such as same skills, arts, language, sport and etc.

Table 1 Problem Statement

The Problem of	Lack of experience sharing among the parents
affects	Children and Parents
the impact of which is	Parents who have kids with special needs or disabilities should be able to talk and share their experiences with families and other parents with the similar situation.
a successful solution would be	Parents would be able to find other families with similar situation and share their knowledge and experiences.

Table 2 Problem Statement

2.3 Product Position Statement

For	Parents
Who	Who are searching for new friends for their children
The MBF	is a Web Application
That	Help parents to define custom criteria and search for friends
Unlike	Facebook, Tinder and all other friend finding sites
Our product	Is designed and focused on children and family needs and provides the filtering feature for finding matches.

Table 2 Product Position Statement

3 Stakeholder and User Descriptions

3.1 Stakeholder Summary

Stakeholder Name	Represents	Role
Leila Jalali Abyaneh	The idea provider	Project manager
Rafael Sanches Carvalho	Guidance	Mentor

Table 3 Stakeholder Summary

3.2 User Summary

User Name	Description	Responsibilities	Stakeholder
User (parent)	Parents are the end users of the application.	They will create profiles for the family and their children and define the criteria's to find friends for their children	N/A
Administrator	Web system administrator	Add, remove or modify data from database, Analyze access, Control security requirements, test, evaluate and installing updates. Taking backups	N/A

Table 4 User Summary

4 Stakeholder Requirements

ID	Requirement	Stakeholder
STK01	Finding matched friend for children	Leila Jalali Abyaneh

Table 5 Stakeholder Requirements

5 System Features

ID	Feature	Stakeholder Requirement ID
FE01	Create profile for the family	STK01
FE02	Creating separate profiles per child	STK01
FE03	Search and filter matches	STK01
FE04	Sending message to found matches	STK01

Table 6 System Features

6 Assumptions

- Minimum of 10 families are required for finding a match
- A minimum of 1 criteria should fit before system offers a match to parents

7 Constraints

Introducing the system to families and promoting the system.
